Beat MS and Many Autoimmune Disorders with Low Dose Naltrexone (LDN)

Mary Anne Boyle Bradley

The story is simple. It is about love, life and hope.

After years of battling with the onslaught of her husband's Multiple Sclerosis, Mary stumbled on a little known doctor in New York City, Dr. Bernard Bihari. Many people were making very bold claims about his work on the Internet. They claimed that Dr. Bihari knew how to stop every type of MS from progressing. Even better, it was claimed that he could help everyone with an autoimmune disorder, ranging from psoriasis to AIDS. It was claimed that Dr. Bihari could help them with Low Dose Naltrexone (LDN). Eventually, Mary's husband took a leap of faith and put Dr. Bihari's work to the test. LDN worked. It stopped his MS from progressing. Her uncle with Parkinson's Disease also tried it. Again LDN worked. It stopped his Parkinsons from progressing. Since September 2002, a worldwide campaign has ignited with passionate momentum, to get the already FDA-approved drug medically recognized for treating MS and all autoimmune disorders. LDN is cheap and has no known side effects. The ambition is for LDN to hit the masses and improve the lives of millions. The trials are near, making this a very exciting time for the LDN community and everyone who suffers from an autoimmune disorder.

Mary Anne Boyle Bradley was born in Chicago in 1971 to Irish parents. She was raised in the west of Ireland from the age of three. After completing her Master's Degree, she worked with financial software in London for five years. Now, she is a stay-at-home mom of three, living in New Jersey, U.S.A. She is happily married to Noel, who has Multiple Sclerosis, and is beating it since starting LDN in September 2002.

"I commend Julia Schopick for spreading the word about these remarkable, yet overlooked therapies that can improve the lives of so many."

—JULIAN WHITAKER, MD  
Founder, Whitaker Wellness Institute, Editor, *Health & Healing* newsletter

# Honest Medicine

MORE THAN 100,000 PEOPLE WORLDWIDE HAVE BEEN HELPED

Effective, Time-Tested,  
Inexpensive Treatments  
for Life-Threatening  
Diseases

INCLUDING MULTIPLE SCLEROSIS, EPILEPSY, LIVER DISEASE,  
LUPUS, RHEUMATOID ARTHRITIS AND OTHER DISEASES

JULIA SCHOPICK

AWARD-WINNING BLOGGER ON HEALTH CARE AND HEALING

"I predict that *Honest Medicine* will become an instant classic."

—Ronald Hoffman, MD, Medical Director of the Hoffman Center  
in New York, host of nationally syndicated radio talk show, *Health Talk*

"A revolution is at hand, and Julia Schopick's new book is  
leading the charge, with banner held high."

—Jeffrey Dach, MD, author of *Natural Medicine 101*

"Julia Schopick is one of those rare people who can go through an  
agonizingly difficult experience and go on to transform her pain  
into a passionate, clear-headed campaign to help others."

—Mary Shomon, *New York Times* bestselling author of *The Thyroid Diet:  
Manage Your Metabolism for Lasting Weight Loss*

"*Honest Medicine* should be required reading for all physicians and  
patients searching for safe and effective therapies."

—David Brownstein, MD, Medical Director of the Center for Holistic  
Medicine, author of nine books on integrative medicine

IN THIS REMARKABLE BOOK YOU WILL DISCOVER:

- How an FDA-approved wound-healing treatment that brought relief and healing for the author's husband was astonishingly downplayed by his doctors.
- A treatment for end-stage liver disease that successfully treats pancreatic cancer.
- A medical treatment, approved in the 1980s for drug and alcohol addiction, that in low doses successfully treats autoimmune diseases and some cancers.
- A high-fat diet used since the 1920s at Johns Hopkins and other prestigious medical institutions that has cured thousands of children with difficult-to-treat epilepsy.
- How a mother's struggle to find treatment for her son's epilepsy finally led her to success with a time-tested, non-toxic diet; she started an organization to educate parents about it.
- How multiple sclerosis patients dramatically improved using an inexpensive, off-label drug but their doctors discouraged its use even after they saw the amazing results.
- How a woman with liver disease was told she had only a few months to live, but after receiving an innovative treatment from a doctor featured in this book she is alive and well eight years later.

Julia Schopick is the creator of the award-winning blog, *HonestMedicine.com*, and has been a published writer and a public relations consultant for more than twenty years. When her husband Tim Fisher became ill in 1990 with a cancerous brain tumor, Julia became his medical advocate and began writing on topics relating to health and medicine: her articles and columns were published in *American Medical News*, *ADVANCE*, *SEARCH* and *Alternative and Complementary Therapies*. Her work and essays have been featured in the *British Medical Journal*, *Modern Maturity* and the *Chicago Sun-Times*. Her mission is to use her writing and public relations skills to inform the world about little-known but promising treatments via her website, her presentations and this book, and to empower people in their health care choices.

# CHILDREN *with* STARVING BRAINS

A Medical Treatment Guide for  
Autism Spectrum Disorder

*Fourth Edition*

Effective  
Biomedical Treatments  
—2011—

Jaquelyn McCandless, MD

**C**HILDREN WITH STARVING BRAINS is a message of hope in the midst of a worldwide epidemic of autism, ADD and ADHD. This is the first book written by an experienced clinician that gives a step-by-step treatment guide for parents and doctors based on the understanding that ASD is a complex biomedical

illness resulting in significant brain malnutrition. Genetic susceptibility activated by "triggers" such as pesticides and heavy metals in vaccines can lead to immune system impairment, gut dysfunction, and pathogen invasion such as yeast and viruses in many children. Dr. McCandless, whose grandchild with autism has inspired her "broad spectrum approach," describes important diagnostic tools needed to select appropriate treatment programs. Her book explains major therapies newly available and identifies safe and effective options for parents and physicians working together to improve the health of these special children.

Parents and physicians alike will welcome this timely book, treasure it, and consult it often. Jaquelyn McCandless is a widely experienced physician and the grandmother of Chelsey, an autistic child. Her book provides a wealth of authoritative, useful, and easily understood information. If you are interested in effective biomedical treatments for autism, you need this book.

—Bernard Rimland, PhD  
Director, Autism Research Institute  
Founder, Autism Society of America

Dr. McCandless regards Chelsey as her primary teacher about autism. Love, dedication and inspired knowledge led her to write *Children with Starving Brains*, called the "bible" by thousands of autism families worldwide and for good reason. CSB is absolutely the best written guide on the recovery path for heartbroken parents who want their children back and for doctors who want to help. Without doubt this new edition is even better than ever and is required reading for all families who work with me.

—Jim Neubrandner, MD
